

densely configured relative to standards for similar (typically family) housing in the community; will not constitute an excessive concentration of very low-income families; and has no other site impairments which clearly should disqualify the site from continuation as public housing.

§971.5 Long-term viability.

(a) *Reasonable investment.* (1) Proposed revitalization costs for viability must be reasonable. Such costs must not exceed, and ordinarily would be substantially less than, 90 percent of HUD's total development cost limit for the units proposed to be revitalized (100 percent of the total development cost limit for any "infill" new construction subject to this regulation). The revitalization cost estimate used in the PHA's most recent comprehensive plan for modernization is to be used for this purpose, unless a PHA demonstrates or HUD determines that another cost estimate is clearly more realistic to ensure viability and to sustain the operating costs that are described in paragraph (a)(2) of this section.

(2) The overall projected cost of the revitalized development must not exceed the Section 8 cost under the method contained in the Appendix to this part, even if the cost of revitalization is a lower percentage of the TDC than the limits stated in paragraph (a)(1) of this section.

(3) The source of funding for such a revitalization program must be identified and already available. In addition to other resources already available to the PHA, a PHA may assume that future formula funds provided through the Comprehensive Grant Program are available for this purpose, provided that they are sufficient to permit completion of the revitalization within the statutory five year time frame. (Comprehensive plans must be amended accordingly.)

(b) *Density.* Density reduction measures would have to result in a public housing community with a density approaching that which prevails in the community for similar types of housing (typically family), or a lower density. If the development's density already meets this description, further

reduction in density is not a requirement.

(c) *Income mix.* (1) Measures generally will be required to broaden the range of resident incomes to include over time a significant mix of households with at least one full-time worker (for example, at least 20 percent with an income at least 30 percent of median area income). Measures to achieve a broader range of household incomes must be realistic in view of the site's location. Evidence of such realism typically would include some mix of incomes of other households located in the same census tract or neighborhood, or unique advantages of the public housing site.

(2) For purposes of judging appropriateness of density reduction and broader range of income measures, overall size of the public housing site and its number of dwelling units will be considered. The concerns these measures would address generally are greater as the site's size and number of dwelling units increase.

§971.7 Plan for removal of units from public housing inventories.

(a) *Time frames.* Section 202 is a continuing requirement, and the Secretary will establish time frames for submission of necessary information annually through publication of a FEDERAL REGISTER notice.

(b) *Plan for removal.* With respect to any development that meets all of the standards listed, the PHA shall develop a plan for removal of the affected public housing units from the inventory. The plan should consider relocation alternatives for households in occupancy, including other public housing and Section 8 tenant-based assistance, and shall provide for relocation from the units as soon as possible. For planning purposes, PHAs shall assume that HUD will be able to provide in a timely fashion any necessary Section 8 rental assistance. The plan shall include:

(1) A listing of the public housing units to be removed from the inventory;

(2) The number of households to be relocated, by bedroom size;

(3) Identification and obligation status of any previously approved CIAP,

§971.9

modernization, or major reconstruction funds for the distressed development and PHA recommendations concerning transfer of these funds to Section 8 or alternative public housing uses;

(4) The relocation resources that will be necessary, including a request for any necessary Section 8 and a description of actual or potential public or other assisted housing vacancies that can be used as relocation housing;

(5) A schedule for relocation and removal of units from the public housing inventory;

(6) Provision for notifying families residing in the development, in a timely fashion, that the development shall be removed from the public housing inventory; informing such families that they will receive tenant-based or project-based assistance; providing any necessary counselling with respect to the relocation, including a request for any necessary counseling funds; and assuring that such families are relocated as necessary to other decent, safe, sanitary and affordable housing which is, to the maximum extent possible, housing of their choice;

(7) The displacement and relocation provisions set forth in 24 CFR 970.5.

(8) A record indicating compliance with the statute's requirements for consultation with applicable public housing tenants of the affected development and the unit of local government where the public housing is located, as set forth in §971.9.

(c) Section 18 of the United States Housing Act of 1937 shall not apply to demolition of developments removed from PHA inventories under this section, but shall apply to any proposed dispositions of such developments or their sites. HUD's review of any such disposition application will take into account that the development has been required to be removed from the PHA's inventory.

(d) For purposes of determining operating subsidy eligibility under the Performance Funding System (PFS), the submitted plan will be considered the equivalent of a formal request to remove dwelling units from the PHA's inventory and ACC and approval (or acceptance). The PHA will receive written notification that the plan has been

24 CFR Ch. IX (4-1-00 Edition)

approved (or accepted). Units that are vacant or vacated on or after the written notification date will be treated as approved for deprogramming under §990.108(b)(1) of this chapter and also will be provided the phase-down of subsidy pursuant to §990.114 of this chapter.

(Approved by the Office of Management and Budget under control number 2577-0210).

§971.9 Tenant and local government consultation.

(a) PHAs are required to proceed in consultation with affected public housing residents. PHAs must provide copies of their submissions complying with §§971.3(a) (1) through (3) to the appropriate tenant councils and resident groups before or immediately after these submissions are provided to HUD.

(b) PHAs must:

(1) Hold a meeting with the residents of the affected sites and explain the requirements of section 202 of OCRA;

(2) Provide an outline of the submission(s) complying with §971.3(a) (4) and (5) to affected residents; and

(3) Provide a reasonable comment period for residents and must provide a summary of the resident comments to HUD.

(c) PHAs must prepare conversion plans in consultation with affected tenants and must:

(1) Hold a meeting with affected residents and provide draft copies of the plan; and

(2) Provide a reasonable comment period for residents and must provide a summary of the resident comments to HUD.

(d) The conversion plan must be approved by the local officials as not inconsistent with the Consolidated Plan.

§971.11 HOPE VI developments.

Developments with HOPE VI implementation grants that have approved HOPE VI revitalization plans will be treated as having shown the ability to achieve long-term viability with reasonable revitalization plans. Future HUD actions to approve or deny proposed HOPE VI implementation grant revitalization plans will be taken with consideration of the standards for section 202. Developments with HOPE VI planning or implementation grants,
